

Season's Greetings from Clinerion!

Another year draws to a close and we celebrate an incredible year in our quest to bring innovative treatments to more patients around the world.

With partners in five continents, sponsors and academics may now use Clinerion's PRS to find patients [around the world](#). With our new, [patented "Anonymized Identification" \(ANID\) technology](#), we have guaranteed patient privacy in everything we do and future-proofed our services for the long run. With new, dedicated offers, we are bringing a new, high-technology and information-rich solution to the generation of real-world data and [market access](#), and support of [precision medicine](#). With new technology partners such as [Cisiv](#) and BlueCloud (look out for the announcement next week!), we are finding innovative ways for our platform to bring solutions to new areas.

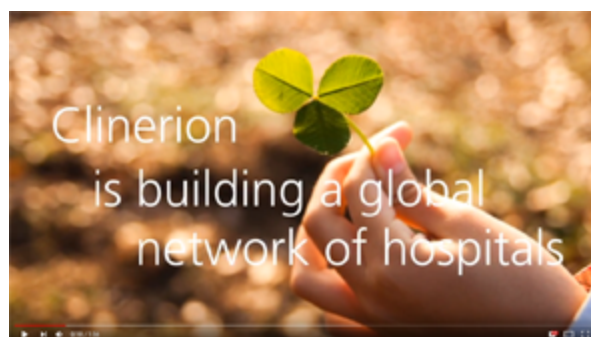

This is still only the beginning. As we enter 2018, we already have a further ten countries contracted to be added to our platform, with many more expected to be added to the list as the year progresses.

We could not have done it without you. Your interest and engagement have guided our path in 2017 and illuminated our way forward. For this, we send you our warmest greetings and thanks! Please enjoy our little gifts below: a new introduction to Clinerion and our introduction to ANID.

With best wishes for 2018,

Ulf Claesson, CEO, on behalf of the Clinerion Team
