

Frontend Developer (Senior) (f/m/x)

We want you!

Clinerion is a Swiss-based software and real-world data services company with international operations in the US, Switzerland and Turkey. Clinerion provides disruptive software solutions supporting life sciences companies and hospitals in the process of developing new medicines.

One of our key solutions is the Patient Network Explorer (PNEx), a platform which generates real-world analytics for Real World Evidence and supports clinical research by automatically finding eligible patients for clinical studies in Big Data settings, such as hospitals and other healthcare organizations. In drug development, this addresses a major problem of finding significantly more eligible patients faster and at lower costs. PNEx works through integration with electronic health records at a global network of partner hospitals and represents a federated network of servers, allowing central querying and local patient identification.

To strengthen our existing development team in our office in Istanbul, Turkey, we are currently looking for a passionate and enthusiastic **Senior Frontend Developer** with a focus on frontend, an eye for design and usability, and the ability to take on the occasional backend development tasks.

Your Role

As a member of the Clinerion development team, you will build responsive web applications using Google Web Toolkit (GWT) framework and Dart framework (Angular based). Maintenance of existing code and fulfilling requests for incremental enhancements are part of this role.

The ideal candidate will be someone with a deep understanding in web application development best practices, as well as HTML, CSS and JavaScript.

You will work in a collaborative team environment that encourages performing at your best and challenges you to create modern, interactive and responsive user interfaces. You will work closely with analysts, developers, test team and technical lead to design and develop robust and scalable software.

Your Responsibilities

- Design and develop responsive web pages with state-of-the-art web technologies and the frameworks Google Web Toolkit (GWT) framework and Dart framework (Angular based).
- Request and discuss required business logic with the backend development team and integration of 3rd party applications if necessary.
- Maintenance of existing code and fulfilling requests for incremental enhancements.
- Functional unit-testing, documentation and bug-fixing.

Minimum Qualifications

- Bachelor's degree in computer science or closely related discipline.
- Minimum 5 years of relevant experience on the job.
- Very good English language skills, verbally and in writing for being able to communicate in a development team with many nationalities.
- Experience in using modern web frameworks, Good Java development experience with focus on Eclipse as IDE.
- Good knowledge and experience of modern web application frameworks, HTML/HTTP, DOM, CSS, JavaScript (Angular/ jQuery), AJAX, responsive web design, cross-browser compatibility, and client-side performance optimization.
- Good knowledge of JavaScript data visualization libraries like D3.js, Chart.js, Leaflet.
- Solid understanding of using server-side communications based on HTTP, AJAX, and SOA architectures (eg. SOAP, REST).
- Passion for learning new technologies fast.
- Open to work in agile development teams (Scrum, Sprint, JIRA).

Preferred Qualifications

- Master's degree in computer science or closely related discipline.
- Very good experiences in user interface design and ergonomic applications experience.
- Good knowledge of backend development and database technologies.
- Experience using modern web frameworks with focus on Google Web Toolkit (GWT 2.8 or higher) or Google Dart (Dart 1 or higher).
- Ability to work independently or as part of a team in a distributed environment. Effective interpersonal and communication skills.

Our Offer

We are offering an exciting opportunity to make an impact on medical innovation and patient care in a dynamic start-up environment. This position has great potential for growth and development. Clinerion has a diverse workplace with flexible work arrangements to support our people achieve work/life balance, while meeting the high demands of our business.
