

PRESS RELEASE

Clinerion launches a series of webinars to introduce the Patient Recruitment System to different regions of the world.

Clinerion will present their Patient Recruitment System, which makes recruitment for clinical trials quicker and more efficient, to hospitals and clinical research sites around the world in a rolling series of webinars targeted at each region.

Basel, August 17, 2016 –Clinerion is launching a series of webinars to introduce the features and benefits of its Patient Recruitment System (PRS) to hospitals and clinical research sites around the world.

Currently with operations in Switzerland, USA and Turkey, Clinerion’s scope is global, and expansion of the Clinerion network is targeted at hospitals, hospital clusters and trial sites in countries throughout Europe, North and South America, and Asia.

Clinerion’s PRS brings more, focused, high quality, international clinical trials to its hospital network. One of the biggest challenges in clinical research is identifying patients whose profiles match study protocols. PRS supports patient search by querying hospital medical records according to selection criteria which are combinations of diagnoses, lab test results, medication, demographic data, and medical procedures. Hospitals can fully leverage their electronic health record databases by gaining the ability to query millions of records in real time. At the same time, hospitals gain high visibility to international trial sponsors seeking patients for clinical research, as sponsors are able to see which sites have the necessary patient pool for their studies.

In the webinar series, Clinerion will demonstrate the Patient Recruitment System, highlighting how it makes the clinical trials recruitment process quicker and more efficient.

The webinars are targeted at hospitals, clinical research sites and service companies running clinical trials. The webinar series commences with a first session on Tuesday, September 6, 2016, at 2pm (Taiwan / Hong Kong / Singapore), 3pm (Korea / Japan), 4pm (Australia (Canberra)) and 6pm (New Zealand). Further sessions are planned.
