

PRESS RELEASE

Basel, Switzerland, December 5th, 2018.

Clinerion welcomes the Santa Casa da Misericordia hospital to the Patient Network Explorer hospital network.

The Santa Casa da Misericordia hospital of Porto Alegre, Brazil, will expand Clinerion's network of partner hospitals in Brazil. Patients from the hospital's seven clinics will gain access to leading-edge, innovative medical treatment via Clinerion's Patient Network Explorer platform.

On the Patient Network Explorer, patients of Santa Casa da Misericordia will have the opportunity to be matched to international clinical trials being run by pharmaceutical companies and clinical investigators around the world. Participation in these trials enhances their access to leading-edge, innovative medical treatments and care.

Users of Patient Network Explorer will gain an expanded insight into the patient population in Brazil and be able to make strategic drug development decisions based on real-time, real-world data.

"Together with our partner, iHealth, Clinerion is in the process of a significant push to encompass coverage of the majority of patients in Brazil," says Clinerion CEO Ian Rentsch. "Santa Casa da Misericordia represents an important addition to Clinerion's network of partner hospitals in the country, the region, and the world."

"Santa Casa has a long tradition in Clinical Research and the Clinerion / iHealth Patient Network Explore will help us maintain leadership in this area," says Dr. Jorge Hetzel, Medical Director for Teaching and Research.

About Clinerion

Clinerion accelerates clinical research and medical access to treatments for patients. We use proprietary technologies for analysis of patient data from our global network of partner hospitals. Clinerion's Patient Network Explorer radically improves the efficiency and effectiveness of clinical trial recruitment by offering data-driven protocol optimization, site feasibility evaluation and real-time patient search and identification to match patients to treatments. Our technology solution provides real-world evidence analytics for medical access. Clinerion facilitates the participation of partner hospitals in leading-edge, industry-sponsored trials and time savings in patient recruitment. We create innovative and disruptive fit-for-purpose solutions which enable pharmaceutical companies to shorten patient recruitment and save costs by streamlining operations and leveraging strategic intelligence. Clinerion's proprietary Big Data analytics technologies leverage real-time data from electronic health records which comply with international patient privacy and data security regulations. Clinerion is a global data technology service company headquartered in Switzerland.
