

Full Stack Developer (f/m/x) (2 positions)

We want you!

Clinerion is a Swiss-based technology and real-world data services company with international presence in Switzerland and Turkey. Clinerion provides disruptive software solutions supporting life sciences companies and hospitals in the process of developing new medicines.

One of our key solutions is the Patient Network Explorer (PNEx), which automatically finds eligible patients for clinical studies in Big Data settings, such as hospitals and other healthcare organizations. In drug development, this addresses a major problem of finding significantly more eligible patients faster and at lower costs. PNEx works through integration with electronic health records at hospitals and represents a federated network of servers, allowing central querying and local patient identification. PNEx also generates data for Real-World Evidence.

To strengthen our existing development team in our office in Istanbul, Turkey, we are currently looking for two passionate and enthusiastic **Full Stack Software Developers** with a focus on frontend, an eye for design and usability, and the ability to take on the occasional backend development tasks.

Your Role

As members of the Clinerion Development Team, you will build responsive web applications, using the Google Web Toolkit (GWT) framework and the Dart framework (Angular based). Continuous improvement and maintenance of existing code are part of this role.

The ideal candidates will be comfortable working with both front-end and back-end coding languages, development frameworks and third-party libraries.

You will work in a collaborative team environment that encourages performing at your best and challenges you to create modern, interactive and responsive user interfaces. You will work closely with analysts, developers, test team and technical lead to design and develop robust and scalable software.

Your Responsibilities

- Build responsive web applications using the Google Web Toolkit (GWT) framework and the Dart framework (Angular based)
- Maintenance of existing code and fulfilling requests for incremental enhancements
- Design and develop responsive web pages with state-of-the-art technologies such as AJAX, HTML and CSS using the web framework Google Web Toolkit (GWT) and Dart
- Assist in the development and maintenance of in-house web applications
- Support the implementation of business logic and persistence layer; integration of 3rd party applications, if necessary
- Functional unit-testing, documentation and bug-fixing

Your Profile

- Bachelor's or Master's degree in computer science or closely related discipline
- Minimum 2 years of relevant experience on the job
- Excellent English language skills, both oral and written, for being able to communicate in a distributed development team with many different nationalities. Other languages are a plus
- Good Java development experience with focus on Eclipse as IDE

- Good knowledge and experience of modern web application frameworks, HTML/HTTP, DOM, CSS, JavaScript (Angular / jQuery), AJAX, responsive web design, cross-browser compatibility, and client-side performance optimization
- Solid understanding of using server-side communications based on HTTP, AJAX, and SOA architectures (eg. SOAP, REST)
- Experience in software development including both frontend and back-end technologies
- Ability to work independently or as part of a team in a distributed environment. Effective interpersonal and communication skills
- Experience using modern web frameworks with focus on Google Web Toolkit (GWT 2.8 or higher) and Google Dart (Dart 1 or higher) or similar is a plus
- Knowledge of JavaScript data visualization libraries like D3.js, Chart.js, Leaflet is a plus
- Experience in user interface design and ergonomic applications experience is a plus
- Experience with backend development and understanding of relational database technologies, service architectures, Spring, JDBC, Hibernate is a plus
- Experience or interest in machine learning is a plus
- Passion for learning new technologies fast
- Open to work in agile development teams (Scrum, Sprint, JIRA)

Our Offer

We offer an exciting opportunity to make an impact on medical innovation and patient care in a dynamic start-up environment. This position has great potential for growth and development. Clinerion has a diverse workplace with flexible work arrangements to support our people achieve work/life balance, while meeting the high demands of our business. This position comes with attractive compensation package, flexible work location and hours.
